about us

Pandora Plastik Industry was established in 2005 as a Limited Company under the initiative of Muhammet Serhan Kursun and later underwent a change in its legal status, becoming a Joint Stock Company in 2015.

Until 2016, Pandora Plastik San. Tic. A.S. engaged in distribution and contract manufacturing agreements with factories producing plastic food packaging, both domestically and internationally. Since its inception, the company has consistently participated in industry fairs worldwide, conducting continuous research and development as well as market studies to provide project-based solutions to its customers. As a result, Pandora rapidly increased its international trade volume, gaining a trustworthy and reputable position in the sector.

To solidify the trust gained in the international arena and to provide faster and higher quality service to its customers, Pandora established its own manufacturing facility in 2016. Conducting exports of its plastic food packaging to over fifty countries, from Europe to Africa, the Middle East to America, Pandora Plastik currently operates in its self-owned production facility covering 12,000 square meters of open space and 8,000 square meters of closed space, following internationally recognized quality and hygiene standards and utilizing state-of-the-art technologies.

Throughout its 19-year history, Pandora Plastik has remained committed to its principles of quality, respect for people and the environment, making customer satisfaction its top priority. As a result, the company has become one of the most successful firms in its sector. With its plastic packaging products, the company serves as a significant supplier to companies in the international arena that produce food, industrial, and chemical products.

Pandora Plastik places utmost importance on maintaining high-quality standards, ensuring that all molds, machines, and robots in its inventory meet top-notch quality and craftsmanship. This commitment allows the company to consistently offer its customers high-quality and solution-oriented products.

quality policy

We will continue to carefully and effectively pursue a Quality Management System based on

- OUR CUSTOMERS' REQUIREMENTS
- CONTINUOUS IMPROVEMENT
- TRAINING AND EDUCATION
- COMMUNICATION

PANDORA Plastics has been providing custom injection moulding and ancillary services to European companies for over 40 years. We continue to maintain our strong market position with an ongoing commitment to ensuring the satisfaction of our customers through the supply of product and service that meets or exceeds their requirements. This will be achieved by maintaining the effectiveness of the Quality Management System, the periodic review of our quality objectives and by operating within the framework of all applicable regulatory requirements.

pandora strong references

We are present in the products of well-known brands globally and nationally. Contact us to join our satisfied customer network.

a special production adventure

We add aesthetics, health and safety to your products in our facility, which produces with the most up-to-date technology equipped with various sensors such as image processing, optical monitoring and metal detection system.

unlimited shapes and colors

Production from non-recyclable raw materials in unlimited designs and sizes as far as you can imagine.

beyond standarts

Within a self renewing organization, we operate with ISO 22000, ISO 9001, and BRCP International standards from procurement to design, from purchase to production in all processes.

our products are in over 50 countries

Pandora, which has a customer portfolio in more than 50 countries, is proud and happy to be preferred.

Let's Save
**OUR
PLANET**

Plastic packaging is inseparable part of our modern life for hygiene and health reasons. The more we depend and consume the plastics in our life, we should use it more responsibly and eliminate it properly. To keep environment safe from the side effects of plastics to nature:

- Re-use the plastic packaging if possible.
- Reduce the plastic waste, do not buy items more than you need within shelf life of product.
- Recycle the used packaging through recycling boxes/containers nearest to you.
- Please do not leave any plastic objects direct to nature.
